

**Dr. Michael Clark**

*Research Scientist, Riverside Research's Trusted and Resilient Systems Group*

Dr. Michael Clark is a research scientist with Riverside Research's Trusted and Resilient systems group. He has been working in the defense community for the past decade and has worked on projects ranging from secure communications, cryptography, data analytics, and machine learning. He currently serves on the Sensor Open System Architecture, or SOSA, consortium's cybersecurity committee, where he provides guidance on cybersecurity issues related to open architecture systems. Dr. Clark is also actively involved in adversarial AI research, where he is developing methods to protect AI and ML from attacks that would give our adversaries a competitive advantage in defeating our systems.
