

Vance M. Saunders is the Director of Cyber Security Programs and an instructor in the Computer Science & Engineering Department at Wright State University. He received his BS (1984) and MS (1989) in Computer Science from Wright State University, both while on active duty in the United States Air Force. Vance joined the faculty at Wright State on 1 Jan 2014 after spending 40+ years in the defense industry: 20 years on active duty in the USAF and 20+ years as a computer scientist/technologist working for Ball Aerospace & Technologies Corp.

As the Chief Technology Officer for Ball's Systems Engineering Solutions business unit, all things cyber space were one his top priorities and interests.

Currently, as the Director of the CyberSecurity program at Wright State University, his duties include interfacing with internal and external constituencies, coordinating program and curriculum changes, advising students enrolled in the program and assisting in recruiting student into the program. As a computer science instructor his duties include teaching, student advising, curriculum development, membership on Graduate Studies Committee, department outreach and laboratory management.
